

**KidsAlert**

*Presents an innovative  
Anaphylaxis Education Program  
designed by KidsAlert*

## **Anaphylaxis & Allergies Management in Schools** **A Protocol Development Program.**

### **Program Overview**

This program is ideal for school staff who manage and care for students at risk of anaphylaxis, but who already have knowledge and skills in the first aid management of anaphylaxis.

This program has been specifically designed to assist school staff and teachers with the obstacles and challenges of managing day to day routines with children at risk of anaphylaxis in the school environment.

The focus of the program is assisting your school to develop *workable protocols* and policies for your **Anaphylaxis Management Policy**. This will make your school environment safer for allergic children and enhance your staff's ability to manage those children at risk. Every Victorian school is mandated to have an Anaphylaxis Management Policy if they have a child diagnosed at risk of anaphylaxis in their school (DEECD Policy - Ministerial Order 90).

### **The key to Anaphylaxis accident prevention is;**

- **Risk Identification,**
- **Trigger Minimisation,**
- **Policy Implementation &**
- **Education.**

Dealing with anaphylaxis can be overwhelming for schools. Every school's requirements and student needs are also individual.

### **Our consultant, Tiffany Thojaya will spend time with your school examining what will work best for your school by offering;**

- **Individualised consultations based on your schools needs**
- A school tour to conduct a **Risk Assessment**
- Identification of potential risks areas and allergy triggers in your school such as in the classrooms, playground, with CRT's, excursions and school camps.
- Recommendations on anaphylaxis accident prevention strategies
- Assistance developing your **Anaphylaxis Management Policy** including; Individual Anaphylaxis Plans, Communication Plans and Emergency Responses (as mandated in the Ministerial Order 90)
- Developing an '**Anaphylaxis Emergency Drill**'
- Up to date information on allergy related issues
- **Other areas that you feel need attention**

## Who should do this program

- Children's Services staff
- School staff
- School Principals
- School Nurses
- School First Aid Coordinators
- Teachers / carers who manage anaphylactic or allergic children

\*There are no pre-requisites for this program however it would be advantageous if you have already completed the 22099VIC First Aid Management of Anaphylaxis or equivalent. It is also recommended that participants have good English, literacy and numeracy skills.

## Duration

The program runs for a minimum of 2.hrs.
